

■ Bursar

Manage AI agents like employees.

AGENTIC PAYMENTS TODAY

Agents are already paying each other.

160M

x402 payments to date

~16M

a month, and climbing

THE PROBLEM

One agent you can manage. A team you can't.

PAYROLL

Five agents, five wallets to fund

THE BOOKS

No one screen for who spent what

CONTROL

No limit that actually holds

AND IT COMPOUNDS Every agent you hire makes all three worse.

THE SOLUTION

Bursar is how you run a team of agent employees.

HIRE

A name, a role, two limits.

SPEND

It buys what the job needs,
inside those limits.

REVIEW

Over a limit, the payment
waits for you.

WHY IT HOLDS The limits live in the contract, not in our app.
